Hi Jay,

I am fine with you sharing these files. If you cannot find them on ATMOS, we also have all modeling files on a temporary FTP site. I can get you the address to that if you're having trouble finding them on your own.

Pat

**Subject:** FW: WRF/MMIF/AERCOARE Modeling?

Pat,

OAQPS is looking for WRF-MMIF outputs and dispersion modeling files for testing of software updates. You can see from the thread below my mention of the South Fork Wind work. Would Region 1 be OK with sharing the modeling files from the project?

I believe most of the files may still be on the ATMOS cluster computer, so I can likely do the sharing myself by identifying the location and sending links. I'll need to do a search. I don't believe we need the actual dispersion modeling files, just the inputs that are on ATMOS.

Thank you,  
Jay

Jay, that would be good to have and may be useful if you don't mind reaching out and asking for them. Thanks!

Subject: RE: WRF/MMIF/AERCOARE Modeling?

Also, thank you to Annamaria's reminder -- Region 1's recent South Fork Wind PSD project used WRF-MMIF to provide AERCOARE inputs that were reconfigured to be used in OCD. It's not quite AERCOARE-AERMOD, but thought it was worth a mention. If it is useful, I do not have the files myself, but could reach out to the R1 permits team.

Jay

**Subject:** WRF/MMIF/AERCOARE Modeling?

All,

I am looking for any modeling that has been performed using WRF data, processed with AERCOARE (or the COARE algorithm) and modeled with AERMOD. This is for testing/comparison/eval of the WRF/MMIF/AERMET process using the draft versions of MMIF/AERMET. Are any of you aware of any modeling that might be useful that you could point me at or provide?

I am not aware of anything that already exists, but I am not aware of a lot of things. 😊

Thanks!

Clint
